World Earth Day

The various teams of SDG CELL of Christ University Representatives pitched in to all the classes of different departments to create an awareness about Energy Conservation on World Earth Day by taking a pledge. This act of pledge taking served as a symbolic gesture of commitment to sustainable energy consumption. This initiative encouraged individuals and organizations to act towards reducing their carbon footprint and to promote sustainability in their communities. All came together to act and work towards Energy Conservation.

World Earth Day Energy Conservation organised by SDG CELL -was an orientation to the students on Energy Conservation.

Goals Followed: Responsible Consumption and Production

PLEDGE

Let's take the pledge to be the change that our planet needs,
to protect and preserve it for future generations.

I pledge to be mindful of my actions,
And manage waste with unwavering persistence.
By reducing, reusing, and recycling,
I'll make a positive impact on our planet's healing.

With conscious choices every single day,
I'll support sustainability in every way.
Together, we'll create a cleaner, healthier world,
And our efforts will never be unfurled.

I vow to conserve resources with all my might,
By limiting my usage and shining a light.
On wastage of water and unnecessary power,
To make our planet a better place to flower.

Let's inspire and encourage others to join this journey,
Towards a brighter, sustainable future that we yearn to see.
For ourselves and generations yet to come,
Together, we can make a lasting difference, as one
