Workshop based on skill development:
Basics of Alteryx
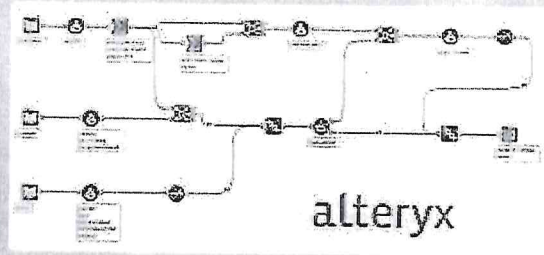

alteryx

Venue: 119,Block IV   Date: 30/3/2019   Time: 9:00 A.M. Onwards

About Alteryx

Alteryx is the only quick-to-implement end-to-end data high end analytics platform that allows data scientists and analysts alike to solve business problems faster than ever. It is a leader in the self-service data analytics movement, with a platform that can discover, prep, and analyze all the data, plus deploy and share analytics at scale for deeper insights.

Some of the benefits of using Alteryx for organisations include:

- REPEATABLE WORKFLOW: Automate manual data tasks into repeatable analytic workflows.
- CODE-FREE + CODE-FRIENDLY: Intuitive interface for both analytics modeling without code and advanced modeling with code.
- DEPLOYABLE ANALYTICS: While many modeling tools exist on the market, we give you the freedom to deploy and manage analytic models.
- FLEXIBLE + DIVERSE: Start with what you need and grow over time with our open platform. We support nearly every data source and visualization tool.
- SCALE + GOVERNANCE: Scaling analytics for your organization translates into performance, security, collaboration, and governance.

There are 3 Alteryx Product Certification Program:

1. Alteryx Designer Core: The Alteryx Designer Core product certification exam is intended to test the aptitude around the 'core' toolset in Alteryx. The 'core' toolset was decided by the selecting the
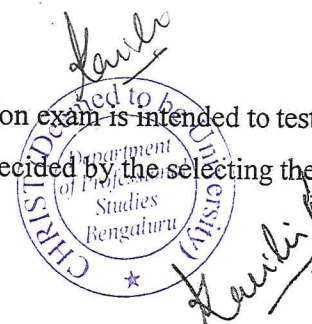

most used tools in Alteryx Designer in addition to understanding basic UI/operational elements. The Alteryx Designer Core is exam is the first level of certification. The exams are highly competitive and on an average 1 in 50 students pass the exams.

2. Alteryx Designer Advanced: The Alteryx Advanced exam is the next steppingstone in the Platform Certification journey, allowing users to demonstrate their higher-level abilities with the Alteryx Designer. The exam builds on concepts, configurations and tools that are included in the Core exam, and also requires users to be able to understand a wider breadth of tool functionality and apply their knowledge to more complex applications. The exam includes two parts. Part I contains multiple-choice and multiple select questions while Part II includes four (4) practical questions that require you to build a workflow to arrive at the correct answer

3. Alteryx Designer Expert: The Alteryx Designer Expert exam measures your ability to use the platform to solve complex analytics problems. The exam builds on the knowledge and skills assessed in the Advanced exam and widens the breadth of concepts covered to include all aspects of Designer. The exam is a performance-based assessment that allows you to prove your skill level and critical-thinking abilities in real-world scenarios.

About Alteryx Program in MBA-LM- Industry Connect through Bengaluru Alteryx User group in March 2019

The Bengaluru Alteryx user group is the world largest usergroup of Alteryx users. The members of usergroup meet every quarter. In 2 occasions, the usergroup has met the students from the MBA LM batch from Christ (Deemed to be) University. The usergroup Facilitates:

- Obtaining Alteryx licenses easily through the Alteryx for Good program
- Interaction of industry professionals from over 70+ companies in Bangalore
- Allows the students to network and understand how Alteryx is used in various other organisations / functions during the use case discussions.
