No. of participants: 52
 [01/03/2019]-[02/03/2019]

Objective:

Through the study of origami, an interdisciplinary approach investigates the mathematical, architectural, and structural aspects of folded structures, which help to understand how paper folding can be used as a medium to solve structural and aesthetic problems.

Learning outcome:

Thinking Skills. Origami excites other modalities of learning. It has been shown to improve spatial visualization skills using hands-on learning.

Activities held:

Introduction to Origami – Introduction to basic concepts of Origami and how folding strategies are explored in architecture through case analysis.

Hand-On Workshop: 52 students started to create a part of the pavilion structure. All the small parts were bought together to create a whole pavilion framework and was installed in the SoA block on day 2 by the students.
