Date: 19.4.21

Time: 3-4pm

" A Road Less Travelled: Discovering Entrepreneurship in Psychology" - Mr Afeef Ahmed

The session started with the mention of the 26/11 Mumbai Attacks, employees of Taj Hotel engagement with the need to save lives when it was easy to escape. Trained to work in times of emergency not like the armed forces yet they did in order, lost lives too. It was to have a better understanding of the need to find your purpose. It was based on "find your purpose". It focused on the start of transition where in a great shift in progress of population has been noticed

It can be critically understood under four stages as stated below:

- Hunter's Age - Art of the need things to sustain
- Farmer's Age - To focus on cultivation
- Industrial Age - Revolutionary change
- Information and Knowledge Age - We are here today, access to information, data and Knowledge. Also called age of wisdom

To understand it better, it is important to critically analyze the process of applying the information with much more cognitive abilities. Noticing a lot of things are oriented from the Industrial age in a constant evolving process.

The question is what is the mindset one is set in by understanding in which age do one belong to. To also understand is to apply and understand what one is good at.

80-90% students go back to the Industrial age approach as in having in mind the capabilities to achieve the set goal it. The mad rush with artificial intelligence is for the rush to fit in. The idea of who knows us the best is oneself, we're the product of choices. Limiting beliefs - Open to door to empowering words and actions

" Society is a source of value" - Current belief system, limitations and empowerment.

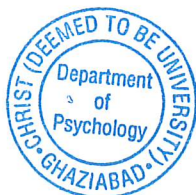

Three areas if you want to be an entrepreneur:

1. What is the pain? Pain is the impact
2. What is the problem? Source of pain is the problem
3. What is the solution?

Everything around is a result of problem-solution. The earlier you find the purpose, the easier it becomes. Work towards your purpose, you find what you create for yourself v/s what is created by others. There should be constant need to find one's purpose/voice.

Highest manifestation of the four intelligence :

- IQ is driven by vision it loves challenges. Seeing with your mind what is possible in yourself, in people, causes, endeavors and enterprise
- Physical Quotient: Driven by discipline is when the vision can be brought to reality. Commitment to being vision to reality.

A handwritten signature in blue ink, appearing to read "Afeef Ahmed".

- EQ: Passion, to sustain with commitment in order to sustain. Driven by vision, discipline and passion together
- Spiritual: Conscience, that is the guiding force. Greater sense of purpose of what needs to left behind. Holds a deeper meaning. Require little more time to explore. Vision and discipline to make it happen and how to drive yourself to discipline. To bring in alignment, start with a vision and drive yourself to passion.

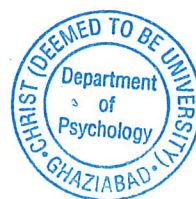

How to develop the four intelligences

1. For the mind: Assume that half-life of your profession is 2 years and now prepare accordingly. Dig deeper and find your purpose.
2. To provide yourself a timeframe
3. To figure out, even in Psychology, which part of Psychology drives you the most

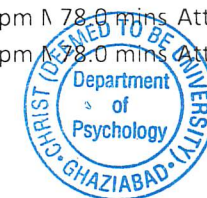

To also focus on identifying and creating a lot of pain and problem statements in order to understand and your goal, start networking-connect with people, explore. Identify the proof of concept is important and plays a major role to form the base for the ongoing, evolving journey of entrepreneurship.

The session was followed by a 20 minutes question and answer round and the circulation of feedback form.

Coordinator and Moderator- Dr. Harguneet Kaur
