IPR- Importance of Intellectual Property Rights in Academic Integrity
Descriptive Report

IPR training enlighten the knowledge of faculties in many ways. It is beneficial for not only the faculties but also PhD scholars and inspiring researchers.

This training program was good for the faculty members, faculty queries and doubts were taken by the trainer . The participants were provided with live examples and hand on training which shall give them the opportunity to experience real world problems.

Most of us who are connected with research in one or other way didn't know when and how to patent our work or project. Why a patent is important and how it is going to be beneficial for us. Participants got a clear view about all these questions which occurs every now and then and left us in deep confusion. It was a seamless training program and very informative. Most of the participants will now know what to patent and what not to patent. Participants were overwhelmed by the session and most of their queries were solved. A big thanks to the team for sharing the knowledge.
